(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFIC (Each deficiency must be preceded by	CIENCIES full regulatory or LSC identifying informati	on)	
F 0574	The resident has the right to receiv	re notices in a format and a language h	e or she understands.	
Level of Harm - Minimal harm or potential for actual harm	27446			
Residents Affected - Some	Based on observation, interview, and record review the facility failed to ensure the state Ombudsman and state agency contact information was accessible, for nine out of 13 confidential residents in a group meeting, who did not know where the contact information was located.			
	Findings Included:			
	On 4/03/2024 at 11:03 AM, during group interviews, nine residents stated they did not know who the state Ombudsman was, how to contact the Ombudsman, nor did the nine residents know where the information was posted. The nine residents also stated they did not know where the posting was located for the contact information for the state agency.			
		PM, of the third and second floors com d activities rooms, and the chapel, reveormation.		
	During the same observation, the first floor was observed to have a large glass display case on the wall in the lobby area. A poster for the Ombudsman's main contact number was on the posting. The state agency compliant hotline number was displayed on another posting however, the posting had the incorrect department listed for complaints. The postings were not readily accessible to residents who resided on the second or third floors.			
	In an interview on 4/05/2024 at 11:11 AM, Administrator A was asked why the Ombudsman and stated agency contact posters were not posted on the second and third floor to be readily accessible to the residents who resided on the second and third floors. Administrator A stated that it had always just been that way, and he had never seen the postings on the second nor third floors before. Administrator A stated that the Ombudsman would make rounds to residents, so they knew who she was, and stated the state agency and Ombudsman contact information was discussed during			
	resident council meetings.			
	Review of the last six months, October, November, and December of 2023, and January, February, and March of 2024, of resident council meeting minutes revealed no discussions related to who the state Ombudsman was, where to locate the posting of the contact information for the state Ombudsman and state agency, nor their right as a resident to file a complaint with the state agency.			

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F 0657 Level of Harm - Minimal harm or potential for actual harm	reflected interventions such as hav light for assistance, and maintainin	Review of the Care Plan revealed R287 had an At Risk for Falls Focus Area initiated on 3/28/24 which reflected interventions such as having commonly used articles in place, reminding the resident to use his call light for assistance, and maintaining the bed in low position. As of 4/4/24, there were no added interventions for the fall R287 had sustained the day prior.		
Residents Affected - Few	Review of the Incident Report dated 4/3/24 at 1:30 AM revealed that R287 stated before going to the bathroom he rolled out of the left side of his bed while sleeping, then got himself off the floor, walked to the bathroom and back to bed. The Incident Report stated that the nurse educated the resident on waiting for help to arrive before transferring even more so after falling. The predisposing situation factor included ambulating without assistance.			
	Review of the Progress Notes sect investigation, discussion, or proper	ion revealed no Interdisciplinary Team intervention for the fall.	(IDT) Meeting Note regarding an	
	Review of the Falls Care Plan reve ambulating.	aled an added intervention on 4/9/24 to	o sit to standing slowly prior to	
	In an interview on 4/10/24 at 11:44 AM, Director of Nursing (DON) B stated that when a resident falls, staff should assess immediately and use the mechanical lift to get the resident up or leave the resident on the floor and call 911 if there are injuries. Falls are investigated which include gathering witness reports from staff. A fall intervention should be implemented immediately. The IDT team will then discuss the fall, review the incident report and staff statements, and revise or add interventions if necessary. The IDT team will review the added intervention for the next three days to assess effectiveness. When asked about the appropriateness of the intervention for R287 to sitting to standing slowly when he sustained a fall due to rolling out of bed mid sleep, DON B stated that she was unsure and would obtain the investigation for R287's fall and speak to the Assistant Director of Nursing.			
	No other information was provided	by survey exit.		
	No other information was provided by survey exit. Review of the Falls Program reviewed on 1/24 revealed that if a fall occurs, the charge nurse will implement an immediate intervention. The IDT team will discuss the fall in a Risk Management meeting within 72 hours of the incident and discuss and determine the root cause of the fall. Additional interventions will be added to the Care Plan or Kardax if deemed necessary.

Level of Harm - Actual harm	**NOTE- TERMS IN BRACKETS H	HAVE BEEN EDITED TO PROTECT C	ONFIDENTIALITY** 34705
Residents Affected - Few	**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 34705 Based on observation, interview, and record review the facility failed to provide prompt medical attention after a fall with multiple fractures for 1 of 3 sampled residents (R61) reviewed for falls, resulting in delay in treatment (21 hours wait prior to hospital transfer for right shoulder fractures), prolonged pain, and suffering. Findings include: Resident #61(R61) Review of the Face Sheet and Minimum Data Set (MDS) dated [DATE], reflected R61 was a [AGE] year old female admitted to the facility on [DATE], with recent hospital readmission post facility fall resulting in two left humerus(upper arm) fractures. Additional diagnoses included cerebral vascular accident with left side weakness, hypertension (high blood pressure), peripheral vascular diseased(decreased blood flow), anxiety disorder and depression. The MDS reflected R61 had a BIM (assessment tool) score of 15 which indicated her ability to make daily decisions was cognitively intact. During an observation and interview on 4/02/24 at 12:16 PM, R61's door was observed closed. Permission to enter was granted by R61. R61 was sitting on the edge of the bed eating meal independently with cast to left arm. R61 appeared calm and able to answer questions without difficulty. During observation and interview on 4/03/24 at 9:50 AM, R61 was observed in bed with full cast on left arm. R61 reported recent fall by bed after self transferring from the commode back to the bed. R61 reported landed on left side and yelled for help. R61 reported 10 out of 10 pain for 3 days before facility staff sent her to hospital. R61 reported the day she was sent to the hospital nurse arrived to shift and sent R61 to hospital related to increased uncontrolled pain. Review of R61 Progress Note, dated 3/18/2024 at 6:08 p.m., reflected, Resident states she got dizzy while trying to get to her commode from bed. Resident assessed and vitals taken. No bruising or injuries noted. Resident states pain to lef

F 0684 Level of Harm - Actual harm Residents Affected - Few	Review of R61 Hospital Orthopaedic Consult, dated 3/19/24, reflected, [named R61] is a 60 y.o. female that presents with left shoulder and elbow pain after a ground level fall that she reports happened on Sunday 3/17/24, 2 nights ago. She has a history of CVA with left upper extremity hemiplegia. She notes pain in the left shoulder and elbow, but is unable to move either at baseline. Assessment: Left proximal humerus fracture, Left distal humerous fracture .Plan: Patient presenting with multiple left upper extremity fractures . maintain long arm splint ad sling to LUE. Elevate & ice to LUE. Pain control . Review of the hospital, Trauma Services Discharge Summary, dated 3/21/24, reflected R61 was admitted to the hospital on 3/19/24 at 4:58 p.m with discharge diagnoses that included, Traumatic closed displaced			
	fracture of left shoulder with anterior dislocation. During an interview on 4/03/24 at 4:00 PM, Certified Nurse Aid(CNA) Y reported was working 3/18/24, when R61 fell in room. CNA Y reported nurse asked for her assistance around dinner time after R61 had been found on the floor. CNA Y entered R61 room and observed R61 on the floor complaining left arm, hurt really bad. CNA Y reported told the nurse and CNA Y she thought it was broke. CNA Y reported the nurse and CNA Y used a gait belt and staff on each side of R61 and lifted R61 under both arms and gait belt back to bed. CNA Y reported R61 call light was on when she entered the room. CNA Y reported R61 was independent in room prior to the fall according to the Kardex. CNA Y reported completed witness statement(not provided with investigation).			
	Review of R61 Care Plan, dated 9/1/21, reflected intervention that included, TRANSFER: 1 person assistance. Remind me to turn towards my strong side when transferring and turning, and encourage me to use call light for assistance. I often self transfer and do not use call light to ask for assistance.			
	During an interview on 4/3/24 at 5:40 p.m., Assistant Director of Nursing (ADON) K reported was not present when R61 fell on [DATE]. ADON K reported R61 was her own person and chooses to self ambulate, however, required one person assist prior to fall. ADON K reported educated R61 post fall about dangers of self transfer and verified R61 had additional fall 3/24/24. ADON K wound expect nurse to do complete assessment prior to transfer resident post fall and use hoyer to transfer. ADON K reported witness statements were part of investigation for R61 fall.			
	During an interview 4/03/24 at 5:40 PM, Director of Nursing(DON) B reported did have witness statements from R61 fall on 3/18/24. DON B reported was unsure at that time what caused delay in x ray services and would expect STAT X-ray to be completed in fours hours. DON B reported R61 was own responsible person and frequently chose to self transfer and was care planned for one person assist with transfers. DON B verified R61 had additional fall on 3/24/24, after fall with fracture on 3/18/24. DON B reported wound expect nurse staff to complete assessment prior to transferring residents post fall and use hoyer to transfer off the floor.

	Review of a Health Status Note dated 11/27/2023 at 10:09 AM reflected IDT met to review recent fall. Resident alert and oriented to person per baseline for this resident. 30-minute checks continue as care planned lights to be on during the day to aid with delirium.		
	Review of the Falls Care Plan reve	aled the intervention 30-minute checks	was initiated on 11/27/23.
	On 4/4/24 at 1:04 PM, an email red 11/22/23 was provided.	quest was made for all Incident reports	for R86. One Incident report dated
	On 04/05/24 at 11:55 AM, the Nurs reports for R86.	sing Home Administrator confirmed that	there were no other Incident
	In an interview on 4/10/24 at 11:44 AM, Director of Nursing (DON) B stated that when a resident falls, staff should assess immediately and use the mechanical lift to get the resident up or leave the resident on the floor and call 911 if there are injuries. Falls are investigated which include gathering witness reports from staff. A fall intervention should be implemented immediately. The IDT team will then discuss the fall, review the incident report and staff statements, and revise or add interventions if necessary. The IDT team will review the added intervention for the next three days to assess effectiveness. When asked how many times R86 had experienced a fall, DON B was unsure. DON B reviewed the Health Status Notes regarding R86's other falls and confirmed that R86 had experienced several falls which should have generated an Incident Report and been investigated. A request for any additional information for the other falls went unfilled by survey exit.

	Based on observation, interview and record review, the facility failed to 1) ensure enteral feedings were provided as ordered to meet hydration and nutritional needs for one (Resident #86); 2) ensure fluids were freely accessible and provided to three (Resident #41, #43, and #86) and 3) prevent significant weight loss for one (Resident #68) of five reviewed for nutrition and hydration, resulting in weight loss, not receiving the ordered tube feeding formula, not receiving the total tube feeding volume ordered, feelings of distress, hospitalization, and the potential for unmet nutritional needs and continued weight loss. Findings Include: Resident #86 (R86) Review of the Admission Record reflected R86 was admitted to the facility on [DATE] and readmitted to the facility on [DATE] with diagnosis which included gastrostomy status (creation of an artificial external opening into the stomach for nutritional support), retention of urine, dementia with agitation and anxiety, need for assistance with personal care, delirium, and dysphagia (difficulty in swallowing food or liquid). The Admission Minimum Data Set (MDS), with an Assessment Reference Date (ARD) of 117/23, reflected R86's Brief Interview for Mental Status (BIMS) was scored 4 out of 15, indicating severe cognitive impairment. The Care plan reflected that R86 did not walk, required extensive assistance of two or more people for toileting and transferring, had an indwelling foley catheter due to retention of urine, and required assistance of one staff member for consuming meals and fluids. R86 no longer resided in the facility. Review of the Nutrition Discharge paperwork from the Hospital dated 11/1/23 reflected that R86 had difficulty swallowing food and drink, however, was safe enough to consume his meals if the food was in a puree texture and the liquids were nectar thick. The Registered Dietician at the hospital also recommended elevating the head of the bed and offering small bites at a slow rate. Liquids should be administered via teaspoon. R86 was to

F 0692 Level of Harm - Actual harm Residents Affected - Few	Review of the Care Plan revealed a Nutritional Focus area dated 11/3/23 which stated R86 had a nutritional problem or potential nutritional problem related to dysphagia, delirium, dementia, and gastrostomy. I am receiving supplemental enteral nutrition. I receive supplemental tube feed via PEG related to dysphagia, weight loss, PO (by mouth) intake and appetite. Interventions dated 11/3/23 included Diet as ordered: Regular Diet/Puree texture/NO liquids. Supplemental Enteral Nutrition if oral intake is less than 75% (Enteral nutrition (EN), also called tube feeding, is a way of providing nutrition directly into the gastrointestinal tract through an enteral access device (feeding tube). Enteral nutrition is a special liquid food mixture containing all of the nutrients required to meet nutrition needs, such as protein, carbohydrates, fats, vitamins, minerals, and other nutrients) and diet as ordered: NPO (nothing by mouth) initiated on 11/3/23 and revised on 12/19/23. Review of the Kardax (portion of the electronic medical record that informs Certified Nursing Assistants of care needs) reflected that R86 eating/nutrition section stated EATING: I am totally dependent on (1) staff for eating. Small bites, slow rate, upright during meals and 20-30 minutes after meals.		
	The Care Plan or Kardax did not reflect that R86 could be offered fluids or to encourage oral intake and th diet orders reflected that R86 was unable to have liquids. Review of a General Diet Physician Order dated 11/1/23 at 5:13 PM revealed Puree texture (for food), neconsistency (for liquids) for dysphagia. Supplement meal with one can of Isosource 1.5 (enteral nutrition for tube feeding) if meal intake less than 75%. Review of an Enteral Feed Order dated 11/1/23 reflected every shift flush feeding tube with 30 ml (milliliter of water before and after medication administration flush feeding tube with 5 ml of water between each medication.		
	Further review of the Physician Ord	ders revealed no additional hydration so	ources for R86.
	Review of the Task documentation following:	for R86's food intake for the dates of 1	1/3/23 until 11/10/23 reflected the
	On 11/4/23 at 8:00 AM, 100% of meal consumed. At 1:00 PM 75% of meal consumed. At 6:00 PM there were no documentation for the percent of meal consumed. Review of the Medication Administration Record revealed no ordered as needed supplemental meal was administered for the day. On 11/5/23 at 8:00 AM, 50% of the meal was consumed. At 1:00 PM 50% of the meal was consumed. At 6:00 PM 50% of the meal was consumed. Review of the Medication Administration Record revealed no ordered as needed supplemental meal was administered for the day. On 11/6/23 at 8:00 AM, 0% of the meal was consumed. At 1:00 PM, 25% of the meal was consumed. At PM, 0% of the meal was consumed. Review of the Medication Administration Record revealed no ordered needed supplemental meal was administered for the day. On 11/7/23 at 8:00 AM, 25% of the meal was consumed. At 1:00 PM, 25% of the meal was consumed. At 6:00 PM, there was no documentation for the percent of meal consumed. Review of the Medication Administration Record revealed no ordered as needed supplemental meal was administered for the day. (continued on next page)

	Review of a Behavior Note at 11/10/23 at 6:00 AM revealed Resident yelled out throughout the shift, frequent reminders given to use his call light. He only used the light several times and the rest continued to yell out for help. When writer or other staff answered his calls for help resident had no needs. One statement he shared with CNA's (Certified Nursing Assistant) was I don't want to die in this place. Resp (respirations)22, T(temperature):99.6 (Fahrenheit), damp cool cloth placed on his forehead. Portable air turned on d/t (due to) room very warm and stuffy . BP (blood pressure) 93/46, pulse 98 . writer rechecked b/p which 95/57. Writer to monitor and report to oncoming nurse. Review of a Health Status Note dated 11/10/2023 at 8:40 AM reflected Resident's B/P is 66/38 ((hypotensive: a blood pressure reading below the specified limit (90/60 millimeters of mercury (mmHg)). He appears non diaphoretic is arousable and communicated with writer that he does not want breakfast. On call provider called, and recommended monitoring vs (vital signs) every 15 minutes and encourage oral fluids. Will continue to monitor.		
	R86's Vital Signs were as follows:		
	11/10/2023 08:40 AM 66 / 38 mmH	lg	
	11/10/2023 08:55 AM 72 / 41 mmH	lg	
	11/10/2023 09:34 AM 87 / 38 mmH	lg	
	11/10/2023 10:00 AM 70 / 30 mmH	lg	
	Review of a Health Status note dated 11/10/2023 at 10:09 AM reflected Resident's blood pressure dropped to 70/30, became unresponsive and was only arousable by sternal rub. He started to have hematuria (bloo in urine) in his foley catheter, order was given to send him to the ER (Emergency Department). Review of the Hospital Paperwork dated 11/10/23 revealed that R86 presented to the emergency department with decreased responsiveness. Per report, [R86] was unresponsive and hypotensive. His blood pressure was 55/40 and 70/30 when Emergency Medical Services arrived. Upon presentation to the emergency room, [R86] required 4 liters of intravenous fluid to improve his blood pressure. Further review of the same Hospital Paperwork revealed that R86 had a serum sodium level of 144 milliequivalents per liter (mEq/L), which indicated that R86's serum sodium levels were on the higher range of the scale. Normal ranges are 135-145 mEq/l). (continued on next page)

F 0692 Level of Harm - Actual harm Residents Affected - Few	Review of a Nutrition Note during hospitalization dated 11/11/23 revealed R86 had inadequate energy intake related to decreased ability to consume adequate .as evidenced by documented intake from previous admission, patient reportedly sleeping most of the day, visible fat and muscle wasting and need for enteral nutrition via peg tube. The Dietician recommended scheduled tube feedings and scheduled water flushes to ensure R86 received the nutrition and hydration required. The document also reflected that R86 had thick oral secretions and weight loss as evidenced by the observation of muscle and fat wasting.		
		11/1/23, R86 weighted 171 lbs (pound bs which is a 6% weight loss in two we	
	In an interview on 04/05/24 at 1:43 PM, Registered Dietitian (RD) I reported that she did not have concerns for R86 as far as not meeting his nutrition and hydration needs because he received nutrition and fluids through his PEG tube. When asked if hydration needs were monitored such as reviewing intake and output or urine characteristics, RD I stated that she did not use intake and output or urine characteristic to ensure hydration needs were being met. When asked if there should be required documentation for someone with a nutrition and hydration risk, RD I reported that providing fluids was a standard of care and therefore, did not require additional documentation. After review of the meal consumption task and order for a PRN supplemental meal bolus, RD I acknowledged that R86 had missed several required feedings.		
		4 AM, Director of Nursing B stated that rsing staff what the percentage of meal ded supplemental feeding.	
	27446		
	Resident #41(R41):		
	Per the facility face sheet R41 was Diagnoses included stroke.	initially admitted to the facility on [DAT	E], and readmitted on [DATE].
	Review of R41's care plans revealed, I (R41) have an ADL (activities of daily living) self-care performance deficit r/t (related to) recent CVA (stroke) with dysphagia (difficulty swallowing), date initiated 11/29/2023, and revised on 1/10/2024. The care plan, under Interventions/Tasks revealed, R41 required staff assistance to walk and transfer. Review of R41's Kardex (document Certified Nurse Aids [CNA] use to know how to provide care to a resident) revealed in the EATING/NUTRITION section, .I (R41) need assistance of (1) staff for eating orally. In an observation and interview on 4/02/2024 at 2:54 PM, R41 was observed in bed, and no drinking water was observed in R41's room. A sign was observed on wall which revealed Pudding Thick Liquids .) During the same observation and interview R41 asked if she could get some water. A staff member was informed of R41's request. At 3:00 PM a Styrofoam cup with a lid was observed to have been placed on a bedside table that was in the bed one area. R41 resided in bed 2. The cup was way out of reach for R41, t straw was laying next to the cup, the water was not pudding thick and had ice in it. (continued on next page)

The quarterly Minimum Data Set (MDS), with an Assessment Reference reflected R68 scored 14 out of 15 (cognitively intact) on the Brief Interview for Menticognitive screening tool).		ic attack (TIA) and cerebral Reference Date (ARD) of 3/16/24,
	terrible, and he could not eat it. R6	s seated on the edge of his bed. He rep 8 reported he had lost weight since his sked what made the food terrible, R68	admission to the facility, and he
	On 04/03/24 at 08:35 AM, R68 was observed in bed. R68 stated he did not have any teeth and was working on getting new dentures before admitting to the facility. R68 reported he had seen the dentist at the facility. He reported difficulty eating due to not having any teeth or dentures.		
	A dental consult note for 9/28/23 reflected, .Edentulous [no teeth] .does not have dentures, unhappy with his chewing ability; oral mucosa appears pink and shiny .		
	A dental consult note for 10/20/23 reflected, .Patient has no dental concerns .Patient has had dentures made in the past but they didn't fit and could not be worn. He is having trouble chewing and would like to have new ones made. This will benefit his nutrition and general health . Took preliminary upper and lower impressions for complete dentures .		
	During an interview on 04/05/24 at 11:13 AM, UM G reported she had contacted the facility's dental group, and was informed they had not started R68's dentures. UM G was told the process for new dentures was started through someone else, and the facility's dental provider could not start a new process for dentures until the old one was discontinued. UM G stated the facility's dental provider reported they would be looking into how to get the old group to discontinue that process so they could start it. UM G reported the facility's dental provider group had never conveyed to the facility that R68 was in the process of getting dentures with another dental group.

F 0791	Provide or obtain dental services for	or each resident.	
Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS H	HAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 38383
Residents Affected - Few	Based on observation, interview an for one (Resident #68) of one revie	nd record review, the facility failed to en wed for dental services.	sure dentures were received timely
	Findings include:		
	Review of the medical record reflected Resident #68 (R68) admitted to the facility on [DATE], with diagnost that included diabetes, dysphagia (difficulty swallowing) and history of transient ischemic attack (TIA) and cerebral infarction. The quarterly Minimum Data Set (MDS), with an Assessment Reference Date (ARD) of 3/16/24, reflected R68 scored 14 out of 15 (cognitively intact) on the Brief Interview for Mental Status (BIMS-a cognitive screening tool). The same MDS was coded No in section L (Dental) for, A. Broken or loosely fitting full or partial denture (chipped, cracked, uncleanable, or loose) and F. Mouth or facial pain, discomfort or difficulty with chewing.		
		of 9/14/23, reflected coding of No in se (chipped, cracked, uncleanable, or loos nt(s) (edentulous).	
	On 04/03/24 at 08:35 AM, R68 was observed in bed. R68 stated he did not have any teeth and was working on getting new dentures before admitting to the facility. R68 reported he had seen the dentist at the facility. He reported difficulty eating due to not having any teeth or dentures.		
	A dental consult note for 9/28/23 reflected, .Edentulous [no teeth] .does not have dentures, unhappy with his chewing ability; oral mucosa appears pink and shiny .
